

3rd iCoachKids International Conference
“Child Centred Coaching”
University of Limerick June 14th and 15th 2019
Hosted By Sport Ireland Coaching

Dear NGB

Sport Ireland Coaching is delighted to host the 3rd iCoachKids Conference in the University of Limerick. The previous iCoachKids conference in Leeds attracted a global audience from as far afield as the USA, Australia and South Africa. We are looking forward to a similar large number of international and national delegates to listen to and debate some of the most important issues relating to creating effective children's coaches.

With the overall theme of ‘**Child Centred Coaching**’, an international and national line-up of renowned youth sport experts will deliver keynotes, workshops and practical sessions over the two-day event.

The delegates will have an opportunity to attend eight keynote sessions and select from multiple workshops addressing issues that includes creating effective children's coaches, keeping children involved, child centred coaching, session planning, physical literacy, ethics in children's sport, holistic coaching, the pedagogical and motivational sport climate, and the role of parents in sport.

I am writing to encourage as many of your coaches as possible to attend what will be an invaluable two days. We are confident that attendance at this very special international event will have a positive impact on the coaches of children in your sport.

For further information on the conference please contact Sheelagh Quinn at 086 2235905.
